17	Handset with indicator light	Functions like a traditional handset.

Soft Key Legend

Your Cisco Unified IP Phone is equipped with soft keys that point to feature options displayed along the bottom of the LCD screen. Soft keys change according to the state of the phone.

The following list describes soft keys offered on the Cisco Unified IP Phone 7940G/7960G. Functionality will vary depending on your system configuration.

Soft Key	Function
<< or >>	Navigates to edit characters.
Acct	Consult your administrator on the use of this soft key.
Answer	Answers an incoming call
Callback	Notifies callers that the called line is free.
Cancel	Cancels the last selection.
CFwdALL	Forwards all calls.
Clear	Clears directory history.
Confrn	Connects callers to a conference call.
Delete	Deletes selected number.
Dial	Dials the displayed number.
DND	Enables the Do-Not-Disturb feature.
Down	Decreases the LCD screen contrast.
EditDial	Selects a number and activates the cursor for editing.
EndCall	Ends the current call.
Exit	Exits from current selection.

Soft Key	Function
Flash	Provides hookflash functionality for three-way calling and call waiting.
GPickUp	Selectively picks up calls coming into a phone number that is a member of a pickup group.
Hold	Places an active call on hold. Resumes a held call.
Login	Provides PIN controlled access to restricted phone features. Contact your local administrator for additional instructions.
more	Scrolls through additional soft key options (for example, use the more soft key to locate the DND soft key).
NewCall	Opens a new line on the speakerphone to place a call.
Ok	Confirms the selection.
PickUp	Selectively pick up calls coming into another extension.
Play	Plays the ring sound sample.
Redial	Redials the last number dialed.
Resume	Returns to an active call.
Save	Saves the last change.
Select	Selects the highlighted option.
Trnsfer	Transfers active calls to another extension.
Up	Increases the LCD screen contrast.

Hold a Call

- Press the **Hold** soft key.
- To retrieve a held call, press the **Resume** soft key.
 - If multiple calls are on hold, use the **Navigation** button to select the desired call before you press **Resume**.
 - If multiple calls on multiple *lines* are on hold, press the line button for the line to which you want to pickup. The call on the other line will automatically be put on hold.

Mute a Call

- While on a call, press the **Mute** button. The **Mute** button automatically lights, indicating that the other party cannot hear you.
- To deactivate the mute function:
 - Press the **Mute** button again.

Lift the handset if you are using mute along with speakerphone.

Manage Call Waiting

To select among calls on the same line, press the line button for the line to which you want to pickup. The call on the other line will automatically be put on hold.

Retrieve Voice-Mail Messages

Select an available phone line, press the **Messages** button and follow the voice instructions.

Transfer a Call

There are two ways to transfer a selected call to another number. Blind transfer immediately redirects the call without your speaking to the transfer recipient. Consult transfer redirects the call after you speak to the transfer recipient.

1. During a call, press the **Trnsfer** soft key. This places the call on hold.
2. Dial the number to which you want to transfer the call.

3. To blind transfer, hang up the handset or press the **Trnsfer** soft key once you hear the line ringing.

To consult transfer, press the **Trnsfer** soft key after the party answers, and hang up the handset.

Note

If the transfer fails, press the **Resume** soft key to return to the original call.

To cancel your consult call transfer attempt and reconnect to the original caller, press **EndCall** and then **Resume**.

Forward All Calls

1. Press the **CFwdAll** soft key. You will hear a confirmation beep.
2. Dial the number to which you want to forward all your calls. Dial the number exactly as you would if you were placing a call to that number. Remember to include locally required prefix numbers.

The phone display will be updated to show that the call is forwarded.

3. Press the pound key (**#**) or the **EndCall** soft key.

To cancel call forwarding:

- Press the **CFwdAll** soft key.

Place a Conference Call

1. During a call, press the **More** soft key and then the **Confrn** soft key to open a new line and put the first party on hold.
2. Place a call to another number.
3. When the call connects, press **Confrn** again to add the new party to the call.

Use Call Pickup

To pick up calls coming into another extension:

1. Press the **PickUp** soft key.

2. Dial the extension number of the Cisco Unified IP phone that you want to pick up. Control of the call will be transferred to your phone.

Place a Call from Your Local Directory

1. Press the **Directories** button.
2. Press the **Up** or **Down** navigation button or press **4** to select the local directory.
3. Press the **Up** or **Down** navigation button to select the Last, First, or Number fields search option.
4. Using the dial pad, enter the last name or first name for the entry.

When entering letters, select the appropriate number key of the letter you want, and press that key a number of times that equals the position of the target letter. For example, to enter a B, press the 2 key two times, and to enter a C, press the 2 key three times. Use the (<<) soft key to backspace while entering data.

5. Press the **Search** soft key to find your selection.
6. If your search results in multiple listings, use the **Up** or **Down** navigation button to select the correct number.
7. Press the **Dial** soft key to dial the selected number.

Program Personal Speed-Dial Buttons

1. Select an available phone line by lifting the handset, by pressing the **NewCall** soft key, or by pressing a button. Listen for the dial tone.
2. Press the pound key (**#**).
3. Press the speed-dial button that you want to program. A short beep confirms that you are starting programming for this button.
4. Enter the speed-dial number. The digits will appear on the phone display. The Backspace soft key (<<) is available to let you reenter digits that were entered incorrectly.

To remove a speed-dial number without replacing it with a new one, press the pound key (**#**).

5. Press the speed-dial button that you are programming a second time to indicate that you have finished entering the speed-dial digits and to store the new speed-dial number.
6. Hang up the handset or press a new speed-dial button and repeat the process.

Place a Call from Your Speed-Dial Numbers

1. Select an available phone line (**offhook**, **Newcall** or **LineButtonPress**).
2. Press the **Directories** button.
3. Press the **Up** or **Down** navigation button to select a speed-dial option.
4. Select the desired phone number from the speed-dial menu or enter the entry number on the phone dial pad.

Activate Do Not Disturb (DND)

For visual call alerting and information without audible ringing, use DND. Calls receive normal call-forward-busy and no-answer treatment.

To activate or deactivate the Do Not Disturb feature:

1. Press the **More** soft key to locate the DND soft key.
2. Press the **DND** soft key.
3. Press the **PickUp** soft key to connect.

For More Information

For additional information on using your Cisco Unified IP phone, contact your local administrator.
